What's your biggest asset?

Some say it's a home, business, IRA, or 401K. I would suggest that your earning power is your most valuable asset. For instance, a 35-year-old who currently makes \$50,000 a year will earn \$1.5 million dollars before age 65. With a 3% annual pay increase, \$2.5 million.

According to US government statistics, a staggering 1 in 4 (25%) of 20-year-olds will become disabled before reaching age 67. And according to the Social Security Administration, 95% of those disabilities happen outside the workplace...so worker's compensation will not pay.* Our policy pays benefits regardless of whether or not the disability is work related.

Seven of 10 Americans say they would feel a financial pinch in a month or less without their paycheck.**

Our flexible disability income insurance can supplement what you currently have through work or it can stand alone to safeguard your paycheck and provide protection against catastrophe.

What if your last paycheck was your last paycheck?
